

Policy

Fortescue Zero Environmental Policy

1 PURPOSE

This document sets out Fortescue Zero's policy on environmental matters in accordance with ISO 14001. This policy aligns with the principles and commitments in the Environment Policy of our ultimate parent undertaking, Fortescue.

2 ABOUT FORTESCUE ZERO

Fortescue Zero is committed to being a leader in safeguarding the environment and taking accountability for our impacts. We are committed to accelerating an efficient, electric and decarbonised future for our customers and for the world. As part of the Fortescue group we are helping to lead a global energy transition, bringing together leading thinkers and engineers under one family to drive progress and combat climate change.

We believe practical, technology and policy-driven solutions are key to addressing our impacts on the environment. We have the technology, the knowledge, the resources, and the will to make it happen. We are implementing measures to mitigate and manage environmental risks and maximising opportunities provided by improvements in science and technology. We integrate these risks and opportunities into our planning and operating decisions to inform our business strategy.

3 PROTECTION OF THE ENVIRONMENT

We understand the immense value that the environment provides and that it underpins almost every aspect of human development. We know there is a vital need to reduce global environmental impacts and to fundamentally transform and transition to a greener future.

Fortescue Zero is committed to driving change and escalating accountability for environmental protection. We encourage and empower those who want to join us in changing the world for the better.

3.1 Climate Change

Fortescue Zero is committed to combating climate change, through the reduction of emissions throughout our value chain and by supporting our customers in accelerating decarbonisation through the supply of Fortescue Zero goods and services.

3.2 Pollution

Fortescue Zero is committed to the prevention of pollution from our operations, and from the operations of our supply chain and customers in relation to the goods and services that we buy and sell.

3.3 Biodiversity

Fortescue Zero is committed to protecting biodiversity through how we conduct our operations and through the conduct of our suppliers.

3.4 Conserving Resources

Fortescue Zero is committed to efficiently using water, energy and raw materials to maximise the value gained from their use.

3.5 Compliance

Fortescue Zero is committed to applying the highest levels of legal compliance and standards for us, our customers, our suppliers and our stakeholders.

4 CONTINUOUS IMPROVEMENT

Fortescue Zero is committed to continuous improvement of our environmental management system and the continual pursuit of enhanced environmental performance.

5 ENVIRONMENTAL MANAGEMENT SYSTEM

This Environmental Policy is relevant to all Fortescue Zero operations. In addition, Fortescue Zero maintains an Environmental Management System in accordance with ISO14001:2015 and regularly reviews the effectiveness and scope of this system. The scope of our Environmental Management System is defined as:

“All on-site activities at our Spires HQ, Banbury Manufacturing and Kidlington Unit 5 facilities associated with the operations of Fortescue Zero Ltd (excluding subsidiaries) where Fortescue Zero maintains operational control in respect to the environmental impacts of our activities, products and services. This includes activities for the motorsport industry at our Kidlington Unit 5 facility.”
